re: Contract 4842 "Sampling and analysis of GW wells at MCB and MCAS"

Brent,  
What's the story on a 9 Jul 96 draft of the above contract? Awarde-d? Is this or drinking water wells and/or monitoring wells, one time shot or continuous? Is this something for the big FSC contract?  
-Mick

Brent's call back -  
"This is ATSDR. annual sampling is now required on all supply wells, as of a couple years ago. To date only 3 rounds of sampling have ever been done. This will be done annually from here on out; indefinitely."
